

TASK 02

COMPETITIVE ANALYSIS (SWOT)

Product Overview

Smart Parking Finder (Product name)

A mobile application that helps users locate, reserve, and navigate to available parking spaces in real time.

Competitors

- *Park+ : Parking management and FASTag services.*
- *ParkMobile : Digital parking reservation and payment platform.*

Detailed Competitive Analysis

Smart Parking Finder vs Park+ vs ParkMobile

Feature	Smart Parking Finder	Park+	ParkMobile
Real-time Parking Availability	Yes	Partial	Yes
Parking Reservation	Yes	Yes	Yes
AI Parking Prediction	Yes	No	No
GPS Navigation	Yes	Limited	Yes
Mobile Payments	Yes	Yes	Yes
User Ratings & Reviews	Yes	No	No
Parking History	Yes	Limited	Limited
Smart Recommendations	Yes	No	No

SWOT Analysis

Strengths

- *Real-time parking updates*
- *AI-based recommendations*
- *Location-based services*

Weaknesses

- *Requires internet connectivity*
- *New brand with limited recognition*
- *Initial data collection challenges*

Opportunities

- *Growth of smart cities*
- *Rising smartphone usage*
- *Government digital initiatives*
- *Increasing urbanization*

Threats

- *Strong competitors*
- *Privacy concerns*
- *High operational costs*
- *Technology failures*

Feature Gap

Existing Problem

Current apps show parking locations but do not accurately predict future availability.

Proposed Solution

AI Parking Prediction System

The app will:

- Analyze historical parking data
- Monitor traffic conditions
- Predict available spaces
- Suggest best parking options
